MARION COUNTY PUBLIC HEALTH DEPARTMENT

Prevent. Promote. Protect.

NUTRITION SERVICES REFERRAL

Please FAX form back to: 317-221-3150

Dietitian Services: Our team of registered dietitians can provide medical nutrition therapy to patients who do not otherwise have access to nutrition therapy due to cost or insurance coverage. We do not provide clinical nutrition care which falls outside the scope of a public health dietitian including tube feedings, type 1 diabetes management, and chronic kidney disease, etc.

Infant Feeding Safety Net (IFSnet)

Lactation Services: Many of our registered dietitians are also certified lactation specialists and can provide breastfeeding support, education, and weight/ infant feeding monitoring.

Formula Access: We can supply families with an emergency supply of infant formula. Note, the Infant Feeding Safety Net is only available Monday- Friday. We can provide a short-term supply of emergency infant formula. We will also ensure that a long-term infant feeding plan is established and monitor infant growth if needed.

HOSPITAL/CLINIC MEDICAL RECORD#: _____
